Aayush Poudel

Computer Engineering Student

EXPERIENCE

Personal Projects & Development

2023 - Present

- Developed full-stack web applications using React and Django
- Built CRUD-based systems with authentication and database integration
- Created a NEPSE Stock Market Analysis System using Python
- Designed and deployed personal portfolio websites
- Practiced real-world development using REST APIs and version control

SKILLS

- Programming (C, C++, Python, JavaScript)
- Web Development (HTML, CSS, React, Django)
- Database Management (SQL, MySQL)
- Data Structures & Algorithms
- REST API Development
- Git & GitHub
- Problem Solving
- Teamwork & Communication

PROJECT HIGHLIGHTS

- NEPSE Stock Market Analysis System (Advanced Python, Data Analysis)
- E-commerce Web App (React + Django, Full-stack with DB Integration)
- Movie Recommendation System (Python, Data Science)
- Hospital Management System (SQL Server, DBMS)

ABOUT ME

Computer Engineering student with practical experience in full-stack development and data-driven applications. Skilled in building scalable web applications using React, Django, and REST APIs, with a strong foundation in Data Structures, algorithms, and database systems. Developed multiple real-world projects including stock analysis systems, recommendation engines, and database-driven applications. Experienced in Git-based workflows and focused on writing efficient, maintainable code.

EDUCATION

Bachelor in Computer Engineering

2024 - Present

Himalaya College of Engineering

+2 Science (Higher Secondary Education)

2021 - 2023

Siddhartha English Boarding School

- Major: Physics, Chemistry, Mathematics
- Graduated in 2023
